

CASE STUDY #104

DATE OF INSTALL: May 2024

LOCATION: USA

PROJECT: Refurbish

APPROVED

THE CHALLENGES

- Multiple joists and exposure to sharp points while pulling
- Concerns with safety due to on site brazing
- Multiple turns and fittings if installed with copper

FLEXIBLE | LIGHTWEIGHT / KINK-RESISTANT

THE SOLUTIONS

- Insulation is robust. It handled well pulling through joists and penetrations very well.
- Eliminating the need for brazing saves time, simplifies installation so more guys can be trusted to perform the task.
- Python's no braze fittings create a safer work space.

THE BENEFITS

- Elimination of expensive copper waste.
- The no braze fitting streamlined the installation, eliminating additional fittings and leak points.

FLEXIBLE | LIGHTWEIGHT / KINK-RESISTANT
